

SRX Series Services Gateways for the Branch

Fast, highly available switching, routing, security, and applications capabilities in a single box.

Juniper Networks® SRX Series Services Gateways for the branch provides essential capabilities that connect, secure, and manage work force centers that range in size from under ten users to hundreds of users. By consolidating fast, highly available switching, routing, security, and applications capabilities in a single box, you can help your customers economically deliver new services, safe connectivity, and satisfy end user experiences. All SRX Series are powered by the proven Juniper Networks JUNOS® Software for unmatched consistency, better performance with services, and superior infrastructure protection at a lower total cost of ownership.

Limited Time IDP Promotions on SRX Series Services Gateways

The Juniper Networks SRX Series Services Gateways together with Intrusion Prevention System (IPS) provides comprehensive protection to stop network and application-level attacks before they inflict any damage to the network, minimizing the time and costs associated with maintaining a secure network.

**Get ONE year of IDP protection for a PENNY
with purchase of the SRX210, SRX240, SRX650**

**Get ONE year of IDP protection FREE
with the cost of a three year IDP license**

Take advantage of these offers by ordering promotional part number on the Juniper Networks global price list. IDP promotional SKUs are orderable until November 30, 2009. 3-yr IDP promo SKUs are 33% less than the standard 3-yr IDP license SKUs.
